EJAZ AHAMED SHAIK

Frontend Engineer | React.js · TypeScript · JavaScript · Frontend Architecture · AI Augmented Development
Bangalore, India · +91-8333823615 · shaik.ejaz.dev@gmail.com · LinkedIn · ejazahamed.com · GitHub

PROFESSIONAL SUMMARY

Frontend Engineer with nearly 5 years of software development experience building enterprise web applications using React.js, Next.js, TypeScript, and Redux. Experienced in frontend architecture, reusable component systems, REST API integration, performance optimization, and automated testing. Strong foundation in Data Structures and Algorithms, Object-Oriented Design, Low-Level Design, High-Level Design, and database fundamentals. At Altimetrik, owned frontend delivery of enterprise HR modules, established reusable UI patterns, and led a team of 3 engineers. Focused on maintainable architecture, production quality, and reliable delivery.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, Next.js, HTML5, CSS3, Redux, Context API, Zustand, Tailwind CSS, Ant Design, Vite
Frontend Engineering: Component Architecture, Reusable UI Components, Custom Hooks, Responsive Design, Performance Optimization, Code Splitting, Lazy Loading
Engineering Fundamentals: Data Structures & Algorithms, Low-Level Design (LLD), High-Level Design (HLD), DBMS, SQL
Testing: Jest, React Testing Library, Unit Testing, Integration Testing
API & Backend: REST APIs, Node.js, Express.js, WebSockets
Tools & Delivery: Git, GitHub, Storybook, Lighthouse
AI-Assisted Development: Claude Code, Codex

EXPERIENCE

Altimetrik | Bangalore, India — *Jul 2024 – Present*

Senior Engineer

Previously Engineer; designation updated during organizational restructuring
Tech: *React, TypeScript, Redux, Ant Design, Jest, React Testing Library, Claude Code, Codex*

- **Owned end-to-end frontend delivery** of the timesheet, innovation, leave management, & offboarding modules, covering UI architecture, reusable components, REST API integration, and cross-functional design discussions through production releases.
- **Led 3 engineers delivering enterprise HR modules**, owning technical planning, code reviews, role- and region-based access control, testing standards, and production releases.
- **Improved team productivity by approximately 30%** and **reduced UI duplication by approximately 40%** by establishing reusable component patterns and refactoring legacy interfaces into modular, maintainable React/TypeScript modules.
- **Improved frontend delivery efficiency** by approximately 35–45% through AI-assisted development workflows and Figma-to-React automation while maintaining enterprise code quality standards.
- Established Jest and React Testing Library test baselines to improve regression coverage and release confidence.

Infosys | Bangalore, India — *Nov 2021 – Jul 2024*

Senior Systems Engineer — *Jan 2024 – Jul 2024*

Systems Engineer Trainee → Systems Engineer — *Nov 2021 – Jan 2024*

Tech: *React.js, Next.js (SSR), TypeScript, Tailwind CSS, Glue42 (Interop I/O), REST APIs, Context API, Zustand, Recharts, Lighthouse, Storybook, Node.js, Express.js*

- **Developed React components for a Glue42** enterprise desktop platform, implemented coordinated client/account search and shared state updates across multiple hosted applications.
- **Built a client-facing financial web portal** and an interactive dashboard with configurable chart and table components using Recharts.
- **Improved development efficiency by approximately 40**% through reusable Storybook components and custom hooks adopted across teams.
- **Optimized complex frontend views** using memoization, lazy loading, code splitting, and Lighthouse-guided performance improvements.
- Integrated frontend applications with REST APIs and developed Node.js/Express mock APIs to unblock parallel development; supported Azure Dev/UAT deployments through CI/CD pipelines.

PROJECTS

Salary Management System | GitHub · Live app · Demo

Tech: *React, Vite, TypeScript, Ant Design, TanStack Query, Node.js, Express, Drizzle ORM, SQLite, Zod, Vercel, Render*

- Built and deployed a full-stack salary management application with employee CRUD workflows, multi-country employee records, and financial reporting dashboards.
- Developed a layered backend architecture and data-access layer using Node.js, Express.js, and Drizzle ORM.
- Designed REST API endpoints for employee management and aggregation-based financial reporting.
- Implemented reporting dashboards covering payroll totals, departmental averages, and outlier detection.
- Integrated frontend and backend workflows using TanStack Query for server-state management and data synchronization.
- Implemented automated tests covering frontend and backend application behavior.
- Made application architecture and data-modeling decisions based on authenticated internal business application requirements.

E-Commerce Full Stack App | GitHub · Live app

Tech: *Node.js, Express.js, MongoDB, React, REST APIs, WebSockets, JWT, Razorpay*

- Designed and developed a MERN-based e-commerce backend using MVC architecture and factory patterns to improve modularity and maintainability.
- Implemented JWT-based authentication, signup, login, password reset, and cookie-based session handling.
- Designed REST APIs and optimized MongoDB queries for product search and navigation.
- Integrated Razorpay payment gateway and email-based OTP verification for secure transactions and account access.
- Implemented WebSocket-based real-time communication to improve application responsiveness.

EDUCATION

Software Engineering Professional Certificate — Scaler Academy *2022 – 2024*

- Data Structures and Algorithms, DBMS (MySQL), Low-Level Design, High-Level Design, Full-Stack Capstone Project

Bachelor of Technology (B. Tech) — JNTU Anantapur *2017 – 2021*

ACHIEVEMENTS

- Rookie of the Unit award and Outstanding performance rating at Infosys — recognized for early impact, project delivery, and dedication to excellence.
