EJAZ AHAMED SHAIK

Full-Stack Engineer | React.js · TypeScript · Node.js · Express.js · MongoDB · MySQL
Bangalore, India · +91-8333823615 · shaik.ejaz.dev@gmail.com · LinkedIn · ejazahamed.com · GitHub

PROFESSIONAL SUMMARY

Full-Stack Engineer with 5 years of software engineering experience building enterprise web applications, financial dashboards, and business-oriented software using React.js, TypeScript, Node.js, and Express.js. Experienced in developing responsive frontend applications, designing REST APIs, implementing authentication and authorization, integrating third-party services, and building data-driven applications. At Altimetrik, owned enterprise feature delivery, established reusable application architecture, and led a team of 3 engineers. At Infosys, contributed to enterprise financial platforms, client-facing financial applications, and interactive reporting dashboards. Hands-on experience building full-stack applications with relational and NoSQL databases, and automated testing.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Ant Design, Redux, Zustand, Context API, TanStack Query, Vite, Storybook, Recharts
Backend: Node.js, Express.js, REST API Development, MVC Architecture, WebSockets, JWT Authentication, Cookie-based Sessions, OTP Verification, Third-party API Integration
Databases: MongoDB, Mongoose, MySQL, SQLite, Drizzle ORM
Security: Authentication, Authorization, Role-Based Access Control (RBAC), JWT, Secure Cookie-based Sessions, API Integration
Testing and Quality: Jest, React Testing Library, Unit Testing, Integration Testing, API Testing
AI-Assisted Development: Claude Code, Codex, AI-assisted coding, code review and refactoring workflows

EXPERIENCE

Altimetrik | Bangalore, India — *Jul 2024 – Present*

Senior Engineer

Previously Engineer; designation updated during organizational restructuring

Tech: *React, TypeScript, Redux, Ant Design, Jest, React Testing Library, Claude Code, Codex*

- Owned end-to-end frontend delivery of enterprise HR platform modules, covering application architecture, reusable components, REST API integration, technical planning, and production releases.
- **Led a team of 3 engineers** delivering enterprise modules including Innovation Portal, Timesheet, Leave Management, and Offboarding, coordinating implementation, code reviews, testing standards, and release activities.
- **Improved team productivity by approximately 30%** by establishing reusable architectural patterns, configurable components, and shared frontend implementation standards.
- **Reduced legacy UI duplication by approximately 40%** by refactoring monolithic interfaces into modular, maintainable, and testable React/TypeScript components.
- Implemented role- and region-based access control at the application layer by integrating frontend workflows with backend authorization contracts.
- Improved application performance through memoization, lazy loading, code splitting, and Redux state optimization.
- Established Jest and React Testing Library testing baselines to improve regression coverage and release confidence.
- Improved design-to-development efficiency by approximately 35–45% through Claude Code, Codex, and Figma MCP-assisted development workflows.

Infosys | Bangalore, India — *Nov 2021 – Jul 2024*

Senior Systems Engineer — *Jan 2024 – Jul 2024*

Systems Engineer Trainee → Systems Engineer — *Nov 2021 – Jan 2024*

Tech: *React.js, Next.js (SSR), TypeScript, Tailwind CSS, Glue42 (Interop I/O), REST APIs, Context API, Zustand, Recharts, Lighthouse, Storybook, Node.js, Express.js*

- Developed frontend modules for a Glue42 enterprise financial desktop platform, implementing coordinated client/account search and shared state updates across multiple hosted applications.
- Built a client-facing financial web portal and interactive reporting dashboards with configurable chart and table components using Recharts.
- Improved development efficiency by approximately 40% by creating reusable React components, Storybook documentation, and custom hooks adopted across development workflows.
- Integrated frontend applications with backend REST services and implemented efficient state management using Context API and Zustand.
- Developed Node.js/Express mock and fallback APIs to support parallel frontend development and reduce backend dependency blockers.
- Improved application performance through component optimization, memoization, lazy loading, and code splitting.

PROJECTS

Salary Management System | GitHub · Live app · Demo

Tech: *React, Vite, TypeScript, Ant Design, TanStack Query, Node.js, Express, Drizzle ORM, SQLite, Zod, Vercel, Render*

- Built and deployed a full-stack salary management application with employee CRUD workflows, multi-country employee records, and financial reporting dashboards.
- Developed a layered backend architecture and data-access layer using Node.js, Express.js, and Drizzle ORM.
- Designed REST API endpoints for employee management and aggregation-based financial reporting.
- Implemented reporting dashboards covering payroll totals, departmental averages, and outlier detection.
- Integrated frontend and backend workflows using TanStack Query for server-state management and data synchronization.
- Implemented automated tests covering frontend and backend application behavior.
- Made application architecture and data-modeling decisions based on authenticated internal business application requirements.

E-Commerce Full Stack App | GitHub · Live app

Tech: *Node.js, Express.js, MongoDB, React, REST APIs, WebSockets, JWT, Razorpay*

- Designed and developed a MERN-based e-commerce backend using MVC architecture and factory patterns to improve modularity and maintainability.
- Implemented JWT-based authentication, signup, login, password reset, and cookie-based session handling.
- Designed REST APIs and optimized MongoDB queries for product search and navigation.
- Integrated Razorpay payment gateway and email-based OTP verification for secure transactions and account access.
- Implemented WebSocket-based real-time communication to improve application responsiveness.

EDUCATION

Software Engineering Professional Certificate — Scaler Academy *2022 – 2024*

- Data Structures and Algorithms, DBMS (MySQL), Low-Level Design, High-Level Design, Full-Stack Capstone Project

Bachelor of Technology (B. Tech) — JNTU Anantapur *2017 – 2021*

ACHIEVEMENTS

- Rookie of the Unit award and Outstanding performance rating at Infosys — recognized for early impact, project delivery, and dedication to excellence.
